

FOCUS

Design Athena

Focus é un sistema a cavi 230V ideale per l'illuminazione di grandi spazi, uffici, show-room, negozi, ma utilizzabile anche in ambienti domestici come sale, cucine, corridoi. La vasta gamma degli accessori consente uno svariato utilizzo nella installazione del sistema, consentendo la tensione dello stesso in qualsiasi forma e di poter prendere l'alimentazione in qualsiasi punto del sistema.

L'apposito cavo a 2 conduttori consente inoltre sia l'accensione alternata che l'accensione simultanea dei corpi illuminanti, consentendo di alimentare gli stessi fino a 2500W per conduttore.

Focus is a 230V cable system perfect for lighting large spaces, offices, show rooms and shops, but it can also be used in domestic environments such as lounges, kitchens and corridors. The vast range of accessories means the system can be installed in a variety of ways, making it possible to tension it in any shape and connect the electricity supply at any point in the system.

The two-conductor cable supplied also makes it possible to switch the luminaires on alternately or simultaneously, meaning they can be supplied with up to 2500W per conductor.
